

# ELECTRICAL SERVICES

## Case Study

### ST GRIMBALDS WINCHESTER UNIVERSITY

ISSUE 1 | OCTOBER 2018 |

#### OUR SERVICES

We provide a wide range of electrical services with the emphasis on providing a quality service, we think outside of the box to provide innovative solutions with the best quality materials future proofing installations.

Our client required the existing controls system altered to accommodate two additional heating circuits, these needed to be time and temperature controlled from the existing BMS system with the use of a system for the temperature sensors.

Due to the buildings layout and wiring constraints we provided a wireless sensor system for the temperature monitoring.

#### CHALLENGE

Requirement to add additional variable temperature heating circuits to the existing controls with wireless temperature sensors.

#### SOLUTION

We undertook the control wiring installation and panel modifications on time, within budget ready for the commissioning.

#### IMPACT

Client was extremely pleased with our turn key solution, we were able to work within their requirements, specification and budget.

# ELECTRICAL SERVICES

The existing panel was already almost to capacity, we had to add in an additional module, relays and terminals to accommodate the alterations.

We pride ourselves on making the modifications look like they were part of the original panel.

"Excellent job undertaken, panel modification look factory fitted and we loved the nice touch of replacing all the indicator lamps to LED. Thankyou AJ Electrical Services"

- James Murphy KENDRA ENERGY

AJ Electrical Services offers you the following:

- 1** Experienced contractor in many sectors with an excellent reputation
- 2** Responsive, reliable, quality services backed by our experienced staff
- 3** From maintenance and installations to compliance testing.
- 4** Resourceful, Planned, Managed and future proofed installations.

We love great feedback from our clients, and always strive to exceed their expectations
